

# ZONE 2 Parkland-Prairie

**ZONE 2** consists approximately of the southeastern quarter of the province, east of Highway 2 from the Montana border to the North Saskatchewan River. Four major rivers that start in the mountains flow through the Parkland-Prairie. For most of the summer, these rivers are large, silty and warm. Shallow lakes and reservoirs are also found in the Parkland-Prairie. The most common game fish of the zone are yellow perch, northern pike and lake whitefish, although walleye have been introduced into several reservoirs. Rainbow trout are stocked into many ponds and small reservoirs throughout the Parkland-Prairie. Sportfishing regulations are separated into Watershed Units for the Milk and South Saskatchewan rivers, including portions of the Oldman and Bow rivers (PP1), and the Red Deer, Battle and North Saskatchewan rivers (PP2).

## ZONE 2 GENERAL REGULATIONS

1. Provincewide regulations on pages 16 to 22 apply to Zone 2. Additional restrictions are set out in this part.
2. Important Definitions appear on page 15.
3. **Limit:** The number of fish you are allowed to keep while fishing at a water body is equal to the 'limit' listed for each species or group of species at that water body.
4. **Possession:** The number of fish of each species you may possess at the end of a fishing trip, regardless of the number of days fished, is equal to a 1-day limit at the water body fished and includes fish stored at home.
5. In these regulations, a Lake Whitefish limit includes Cisco (tullibee).
6. In these regulations, a Goldeye limit includes Mooneye.
7. A zero bag limit has been implemented for all Sturgeon fishing in Alberta.
8. All fish kept from Zone 2 count as part of the provincewide possession, which must not be exceeded (see Provincewide Maximum Possession page 18).
9. Bait Fishing: (see definition for bait on page 15).
